

## TILES, PAVERS & CLADDING

#### FROM TRADITIONAL TO CONTEMPORARY FROM ELEGANT TO WHIMSICAL

Architects and designers have found new opportunities in painting the floors and the walls of homes and commercial projects with our unique selection of field and textured accent tiles.

We reveal and exploit the versatility of concrete in this astonishing variety of styles, textures and colors.

### METALCRETE® CLADDING

The MetalCrete<sup>®</sup> process allows for an entire fixture to be covered by a genuine soft- metal finish or for metal accents to be strategically applied. Even our concrete soaking tubs can have a MetalCrete<sup>®</sup> surface on the exterior. Unlike sealed concrete or our stain-free NuCrete<sup>®</sup> concrete, MetalCrete<sup>®</sup> is a living finish that will wear its age proudly. A typical MetalCrete<sup>®</sup> countertop will begin with a clear, polished look, but these are genuine soft metals. As such, they will scuff and scratch. Less so with wall cladding, but expect your MetalCrete<sup>®</sup> sinks and countertops to gradually take-on the worn and weathered character of an old-world country tavern or perhaps an antique painting.

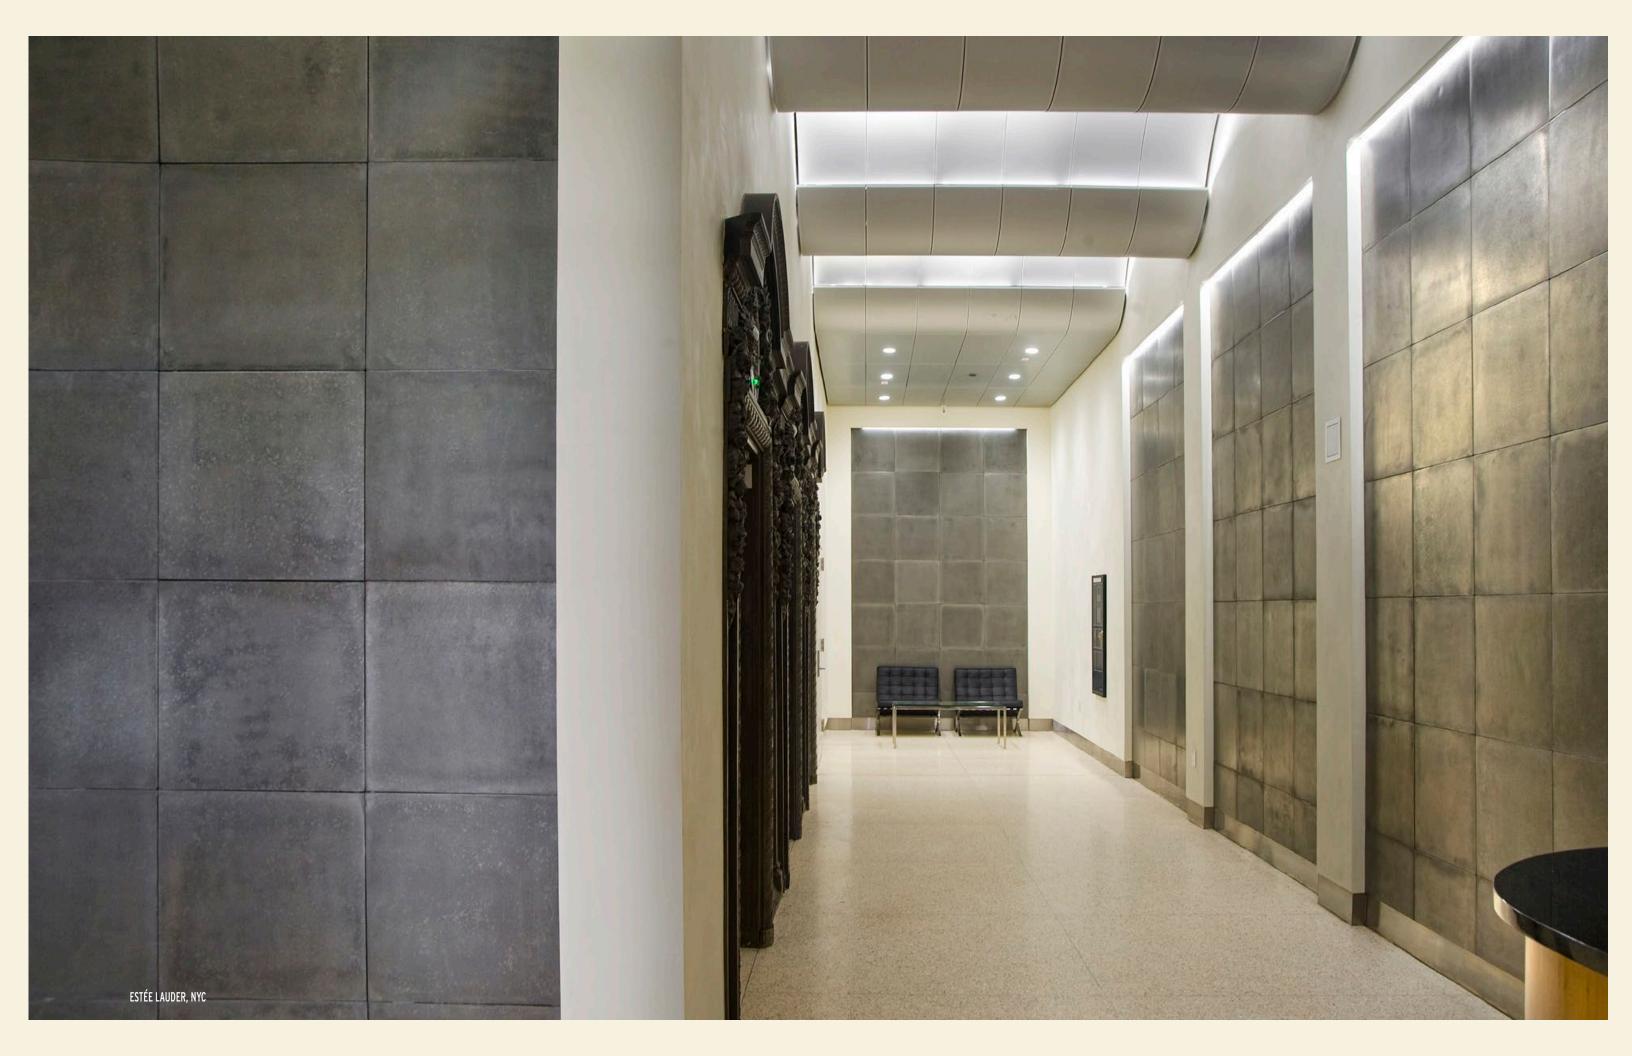

MetalCrete<sup>®</sup> is not for everyone or every purpose, but if you enjoy a genuine, soft-metal finish that displays an everevolving patina of wear, you will love MetalCrete<sup>®</sup>. The appearance will be truly unique to your fixture.

Only from Sonoma Cast Stone.
